

# New & Improved Herbalifeline®

An Omega-3 supplement for cardiovascular and joint health.\*

## KEY BENEFITS

- Helps maintain healthy cholesterol and triglyceride levels that are already within a normal range
- May assist in maintaining peripheral circulation and promoting general health
- Temporary relief of the pain of arthritis\*

## COMPREHENSIVE SUPPORT FOR GOOD HEALTH

In the human body, essential fatty acids play a multifunctional role:

- Key component in the membranes of all cells
- Essential for normal health and development
- Important for fat transport and metabolism
- Converted into prostaglandins - these hormone-like substances are considered to be essential for proper brain function; improve immune function and help reduce inflammation.

Many diets lack sufficient essential fatty acids, especially the important Omega-3 fatty acids. These fatty acids are essential because the body cannot produce Omega-3s and must obtain them from dietary sources. Herbalifeline® is an excellent way to supplement your daily intake of Omega-3 fatty acids, with its exclusive blend of highly refined marine lipids containing eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA).

With 50% more of the Omega-3 fatty acids EPA and DHA per softgel, new & improved Herbalifeline® still uses the same great formula containing clove, peppermint and thyme oils that minimises aftertaste and improves digestibility.

## FAST FACTS

- Wild (not farmed) sardine and anchovy fished in cold pristine waters off South America
- Daily supplement to ensure an adequate intake of healthy omega-3 fatty acids
- Studies show that EPA and DHA may promote cardiovascular health
- Essential oils of thyme, peppermint and clove keep oils fresh and improve digestibility
- Includes antioxidant Vitamin E to help preserve the freshness of the fish oil.

*"Herbalife's approach to Heart Health targets the nutritional well-being of your vascular system by nourishing your body to promote the function of virtually every organ."*
