

Chew Slim Gum

Chew your hunger away.

For calorie-conscious people who wonder how to get through those difficult between-meal hours, Herbalife delivers some great-tasting relief. With Chew Slim Gum, you can pop two pieces in your mouth the moment your stomach starts growling. It will help curb those hunger pangs and keep you on course to reach your target weight.*

What makes Chew Slim Gum so effective?

It's a powerful blend of special hunger-taming herbs that work together to help you stay on top of your diet. Among other ingredients, Chew Slim Gum features Siberian ginseng, which is an adaptogen. This means it helps you adjust to stressful situations more effectively and thus produces a "normalizing" effect on your system.

Chew Slim Gum also features kola nut powder extract. Kola nut possesses mildly stimulating properties similar to that of caffeine. It is used widely as a general tonic. Another ingredient in Chew Slim Gum is stevia powder extract. Actually sweeter than sugar, stevia is almost calorie-free and helps maintain your body's blood-sugar balance while providing a slight energy boost. As a result, stevia is excellent for use in a weight-control product.

If you're trying to lose weight, you know all too well that those between-meal hours are the hardest ones in the day. Chew Slim Gum will help make those periods easier to navigate. Besides, it's a great-tasting, mint-flavored chewing gum—one that doesn't burden you with unwanted calories. Put some enjoyment into your weight-loss program with Chew Slim Gum.

Discussion Points

- Made from natural herbal ingredients: The ingredients of Chew Slim Gum work together to help curb hunger pangs, thereby keeping your weight loss on track. Dieting doesn't have to be difficult—and it isn't when you use Chew Slim Gum as part of your Thermojetics® Green Weight Management Program.
- Super CitriMax is a highly refined form of the herb garcinia which contains hydroxycitric acid, known to reduce fat storage and suppress appetite. Jasmine Green Tea provides both a thermogenic and antioxidant boost.
- A psychological edge: Part of the comfort people receive from food is rooted in the sheer satisfaction of chewing something of substance. Chew Slim Gum provides this satisfaction without providing the unwanted calories.
- Combine with other products: Chew Slim Gum can be used in conjunction with the Thermojetics® Weight-Management Programs and Herbalife's entire line of nutritional products.

Did You Know?

Historians believe that civilizations were chewing natural gum thousands of years ago, when ancient Greeks chewed resin from the mastic tree. Modern chewing-gum products appeared in the late 1800s, when Mexican General Antonio Lopez de Santa Anna hired New York inventor Thomas Adams to develop a new form of rubber using chicle (which Mexicans had been chewing for centuries). Adams was unsuccessful in developing rubber, but he did succeed in producing the first modern chewing gum.

Fast Facts

- An herbal chewing gum that helps decrease between-meal hunger pangs.
- Begins working as you chew.
- Zesty mint flavor is deliciously refreshing.
- Helps provide the oral gratification dieters often need.
